### **DETAILED ACTION**

1. This office action is a response to the amendment filed on 9/25/2003.

#### ***Claim Objections***

2. Claims 33-35 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 33-35 are recited as dependent claims of a cancelled independent claim 8.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-7 and 32-35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The limitations "the spacer configured to move along a length of the biasing member when the biasing member is stationary" recited in line 7-8 of claim 1 and line 5-6 of claim 32 do not described in the specification and appear to be a new matter.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-7 and 32, as best understood in view of the rejections under 112 first paragraphs, are rejected under 35 U.S.C. 102(b) as being anticipated by Hirata (US PAT. 4,063,054).

Fig. 4a-4d of Hirata teaches a method for restricting travel of moving contact in a key switch comprising steps of: providing a spacer (13,14) and a biasing member (15); positioning the biasing member within the spacer such that the spacer (13,14) extends only around the biasing member; and installing the biasing member and the spacer in a contact carrier (21). In Fig. 4a and 4d, Hirata shows that the biasing member is located within the spacer after the spacer is pressed.

Re. Claim 2: Fig. 4d of Hirata '054 shows the spacer having a length substantial equal to the compressed biasing member length.

Re. Claim 3: Fig. 4a and 4d of Hirata '054 shows that the spacer engaging a moving contact (17) when the moving contact moves the safe travel distance (from a position of Fig. 4a to a position of Fig. 4d).

Re. Claim 4: Fig. 4a-4d of Hirata '054 shows that the biasing member engages to the moving contact.

Re. Claim 6: Fig. 4a-4d of Hirata '054 shows that the spacer aligns substantially parallel to a back of the moving contact.

Re. Claim 6: Fig. 4a-4d of Hirata '054 shows that the movement of the moving contact is relative from a front wall (Fig. 4a) to a rear wall (Fig. 4d) of the contact carrier and a centerline axis of the contact.

### ***Response to Arguments***

7. Applicant's arguments filed 9/25/2003 have been fully considered but they are not persuasive. Applicant argues that the prior art of record fails to disclose the claimed invention such as "the spacer configured to move along a length of the biasing member when the biasing member is stationary". However, examiner traverses the argument that the limitations are not originally disclosed in the specification and it appears to be a new matter.

### ***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
